INSTRUCTIONS FOR CUSTOM ORDERS

Every model we build is made to exacting standards to assure that it accurately reflects the original airplane in extensive detail. We at GOW are very proud of these models; we think they excel in quality and craftsmanship. We are the best in the industry.

We MUST have the following before we can start production of your model:

- 1. A three view line scale drawing of the aircraft.** You can usually find this in the front pages of your aircraft owner's manual. Jane's aircraft book is another good source.
- 2. Color photos or pictures clearly reflecting accurate colors, paint schemes, and markings.** The more detail you provide the better you model will be.
- 3. Actual color chips are needed!**
- 4. Please indicate the scale in which your wood model is to be reproduced.** (1:24, 1:72, etc.)
- 5. Please give us the exact name and model of the aircraft, along with the model year.** This helps us with accuracy. (i.e., 1991 Beech Bonanza, A-36)

We cannot start production of your model until we have all of the above items.

In order to keep the quality high we do not mass produce any of the models. Each model is individually hand crafted and this takes eight to twelve months to complete and deliver after we receive all of the above items.

**Note: Sometimes supplier and shipping delays in the Philippines may cause the production time to increase. Because of the custom nature of the product, full payment must be received in advance. Charge cards will be processed upon entry of the order

I have read, understand, and agree to these terms.
